Introduction

Welcome to the *Source Four PARNeI Assembly Guide*.

Please note that the part numbers listed in this guide may differ from the parts required for your particular Source Four PARNeI fixture. Part numbers for fixtures change occasionally as parts are replaced or upgraded.

To ensure that you are ordering the proper part for your specific fixture, please contact your ETC dealer, or ETC Customer Service for assistance.

Document Conventions

This document uses the following conventions to draw your attention to important information.

Note: *Notes are helpful hints and information that is supplemental to the main text.*

CAUTION: *A Caution statement indicates situations where there may be undefined or unwanted consequences of an action, potential for data loss or an equipment problem.*

WARNING: A Warning statement indicates situations where damage may occur, people may be harmed, or there are serious or dangerous consequences of an action.

WARNING: RISK OF ELECTRIC SHOCK! This warning statement indicates situations where there is a risk of electric shock.

All ETC documents are available for free download from our website: etcconnect.com.

Please email comments about this manual to: TechComm@etcconnect.com.

Help from ETC Technical Services

If you are having difficulties, and your problem is not addressed by this document, try the ETC support website at support.etconnect.com or the main ETC website at etconnect.com. If none of these resources are sufficient, contact ETC Technical Services directly at one of the offices identified below. Emergency service is available from all ETC offices outside of normal business hours.

When calling for help, take these steps first:

- Prepare a detailed description of the problem
- Go near the equipment for troubleshooting
- Find your notification number if you have called in previously

	7060A4095	Label, 750W, handle, white	1

Assemble Lamp Socket

Figure 3

Tools required: #2 Phillips screwdriver

1. Install the ground wire (6) and the TP22 assembly (9) in the sleeving (10). See [Figure 3](#).
2. Snap the focus handle (5) onto the burner (3). See [Figure 2](#).
3. Secure the ground wire lug (6) onto the burner casting (3) using screw (7).
4. Place the TP22 assembly (9) into the burner casting (3). See [Figure 3](#).

Note: *Position the wires with the green ground wire on top of the two TP22 white leads. Make sure the green ground wire is not touching any part of the burner casting.*

5. Insert the screws (8) into the four positions in the strain relief casting (4). See [Figure 3](#).
6. Position the sleeving assembly (10) as shown in Figure 3. Fold the sleeving so it fits cleanly in the slot between the burner and the strain relief.
7. Place the strain relief (4) on the burner casting (3). Loosely attach the screws (8). The TP22 assembly (9) must be centered in the strain relief opening (4). See [Figure 3](#).
8. To guard against stripping the screws, tighten them in the order shown in [Figure 3](#).
9. Make sure the focus handle is secure, then insert the knurled head screw (1) through the handle (5) into the burner casting (3). Tighten securely.

Housing Assembly

12	7061A4013	Bushing, focus knob	1
13	7061A4014	Gear, focus knob	1
14	7061A4015	Focus knob	1
15	HW2154	Screw, PPH, 6-19 x 1.2L, 48-2 Plastite	1
16	7061A4010-2	Zoom lens, stippled/wave	1
17	7061A4010-1	Zoom lens, clear/wave	1
18	HW750	Spring, retainer	1
19	HW4145	Screw, 10-32 x 3/8, PhPH, Taptite, BO	1

Assemble Housing

Tools Required:

- Minimally padded work surface (cardboard, carpet, or rubber mat recommended)
- Phillips screwdriver

WARNING: This procedure may crack or break the reflector. Always wear gloves, safety glasses, and a dust mask when performing this procedure.

1. Install the reflector mount silicon pads (8) in the left barrel assembly (5). Install the pads in two places on both sides. See [Figure 4](#).
2. With the wave side of the lens facing toward the front of the fixture, install the clear/wave lens (17) into the rear lens track.
3. Assemble the focus knob assembly (12, 13, 14). Rotate the focus knob to the full spot position. The arrow on the focus knob will point approximately to the 11 O'clock position.
4. Place the focus knob assembly into the left barrel (5).
5. Install the lens stop (10) and the rotator spring clip (6) into the lens rotator (9).
6. Install the lens rotator (9) into the left barrel (5).
7. Install the rotator pressure clip (6) into the left barrel with screw (19).
8. Install the gel retainer clip (1) and the spring retainer (18) into the right barrel (4).
9. Attach the right barrel to the left barrel using screws (7) in three places. Hand tighten only (25 inch pounds).
10. Check that the gel clip retainer (1) moves easily into position.
11. Check for smooth rotation of the lens rotator (9).
12. Position the fixture with the front of the unit facing you, and tilted slightly down. With the wave side facing inward, install the stippled/wave lens (16) into the lens rotator (9).

Figure 5

13. Rotate the focus knob to the full spot position.
14. Hold the lens by the edge and position it so the wave side faces the rear of the fixture. See [Figure 5](#).
15. From the top of the fixture, slide the lens behind the lens catchers and position its base behind the tabs on the bottom 4th lens rotator ring.
16. Gently push the top of the lens inward until it snaps behind the spring clip.

Position the Stippled/Wave Lens

Figure 6

1. There are seven notches cut into the stippled side of the lens. Position the lens so the cluster of three notches is on top. The center notch of the cluster aligns with the spring clip on the lens retainer ring. See [Figure 6](#).
2. The bottom of the lens has a cluster of four notches. Place the two center notches behind the tabs at the bottom of the lens rotator ring.

Clean the Reflector

WARNING: Do not use ammonia-based or other harsh commercial cleaners. Clean reflector only as directed.

Commercially available glass cleaning agents should be avoided as they may contain ammonia, other harsh chemical detergents or abrasive agents. These cleaners may damage the glass surface and the Anti-Reflective coatings. Do not immerse or soak the glass in any cleaning solution.

1. Remove the lens to expose the reflector so you can access it from the front of the fixture.
2. Remove dust with a blast of oil-free air or wipe with a clean, lint-free cloth. Isopropyl alcohol, distilled water or a 50%-50% mixture of each can be used to clean the glass surface.
3. Reinstall a lens before using the fixture.

Clean the Lens

WARNING: Do not use ammonia-based or other harsh commercial cleaners. Clean reflector only as directed.

Commercially available glass cleaning agents should be avoided as they may contain ammonia, other harsh chemical detergents or abrasive agents. These cleaners may damage the glass surface and the Anti-Reflective coatings. Do not immerse or soak the glass in any cleaning solution.

Note: The fixture must be disassembled in order to clean the rear clear/wave lens. See [Assemble Housing on page 7](#) and reverse steps 12–3.

1. Remove dust with a blast of oil-free air or wipe with a clean, lint-free cloth. Isopropyl alcohol, distilled water or a 50%-50% mixture of each can be used to clean the glass surface.
2. Reassemble the fixture.
